# CVS Hardwired Series – Constant Voltage Transformers

Superior voltage regulation of  $\pm 1\%$  sets the CVS series apart from other power conditioning technologies on the market. Extremely tight regulation is accomplished by SolaHD's ferroresonant transformer technology. The CVS recreates a well regulated sinusoidal waveform that is well isolated from input disturbances including:

Impulses

Swells

- Brownouts
- Sags
- Severe waveform distortion

No other power conditioning technology provides as complete a solution against these power quality disturbances. The CVS series is ideal for applications where even a small change in voltage level can lead to unscheduled downtime, misoperation, incorrect data or scrapped production.

### Applications

- Industrial automation and control equipment PLCs
- Analytical laboratory and factory automating equipment
- Photo processing equipment
- Sound/recording systems
- Photographic enlargers
- Broadcast equipment

#### Features

- $\bullet$  Superior voltage regulation of  $\pm 1\%$
- Surge protection tested to ANSI/IEEE C62.41, Class A & B waveform
- Harmonic filtering

# Selection Tables: Single Phase

# Group 1 – CVS Series, 60 Hz

- Acts as a step-up/step-down transformer
- Galvanic isolation provides exceptional circuit protection
- •25 year typical mean time between failure
- No maintenance required

# **Certifications and Compliances**

- . c(UL)us Listed
- UL 1012
- CSA C22.2 No. 66
- RoHS Compliant

# **Related Products**

- On-line UPS (S4K Industrial)
- Surge Protection
- Three Phase Power Conditioners
- Active Tracking<sup>®</sup> Filters

VA	Catalog Number	Voltage Input	Voltage Output	Height in (mm)	Width in (mm)	Depth in (mm)	Ship Weight Ibs (kg)	Design Style	Elec Conn

#### Specifications

Parameter	Condition	Value						
Input								
Voltage	Continuous at full load (lower input voltage possible at lighter load)	+10% to -20% of nominal						
<b>-</b> J-	For temporary surge or sags	+20% to -35% of nominal						
Current <sup>1</sup>	at Full Load & 80% of nominal input voltage	I <sub>in</sub> ≅ (VA/.87)/(V <sub>in</sub> x 80%)						
Frequency	See Operating Characteristics section for details.	60 Hz						
	Output <sup>2</sup>							
Line Regulation	V <sub>in</sub> >80% and <110% of nominal	±1%						
Overload Protection	At Nominal Input Voltage	Current limited at 1.65 times rated current						
Output Harmonic Distortion	At Full Load within Input Range	3% total RMS content						
Noise Attenuation	-Common Mode -Transverse Mode	40 dB 40 dB						
	General							
Efficiency	At Full Load	Up to 92%						
Storage Temperature	Humidity <95% non-condensing	-20° to 80°C						
Operating Temperature	Humidity <95% non-condensing	-20° to 50°C						
Audible Noise	Full Resistive Noise	32 dBA to 65 dBA						
Warranty	10 year limited warranty							

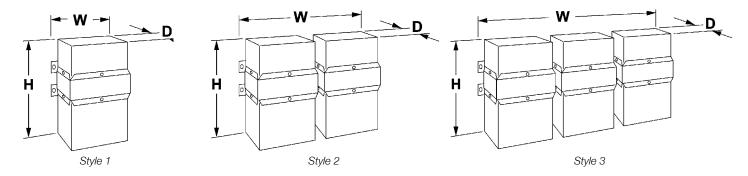

#### Notes:

1 - Consult user manual for fuse sizing.

2 - It is recommended that the unit run at a minimum of 40-50% load.

See the Operating Characteristics section for more details.

#### **Design Styles (CVS and MCR Hardwired)**

These styles are single phase only.
